TECHNOVANZA

Taking technology to society

TECHNOHUNT 2017

Theme - Technical Pirates of Sea

There comes a time in every rightly construed mind when it has a ragging desire to go somewhere and dig a hidden treasure. Now here's a chance for all you techies to fulfil your desires. Expect ambiguous technological questions, logic & reasoning, various tricky tasks, surprising coding queries, team work & co-ordination and lots & lots of fun. So, get ready for this rollercoaster ride and go accomplish your destiny to hunt down the treasure within.

Get ready for the Ultimate hunt of 2017. Remember what our beloved Captain Jack Sparrow said, *"Not all treasure's silver and gold, mate."*

Gameplay

In this event participants will be sailing towards the treasure being inside VJTI college campus. But before starting journey toward treasure they should prove their worth for it.

Round 1: Rush to ship

Part 1:

It will be a paper based question answer in which there will be some questions. These questions will be based on general knowledge, direction sense and aptitude questions like relations.

Part 2:

Again, in this round question will be there, but now with a crossword and questions will be in form of audio/video or image. Only fixed number of teams will be selected for sailing.

Round 2: Sailing toward the treasure island

Part 1:

You must make this ship working, since many of the circuits are not in working condition so you have to make all circuits working properly and if some components are lost then you have to complete them.

Part 2:

In this round, participants will be given a riddle which will lead them toward next check point. If they are not able to crack the riddle they can ask to skip that riddle which will deduct some marks and they will not be getting marks associated with that riddle.

Also, there will be bonus points for bonus clues such as QR code in their way if they can find them. Along with that there will be list of few things which will give them bonus points. This list will be declared at the time of event.

Round 3: Let's explore treasure island

Part 1:

After 2nd round all teams will report to treasure island. Only few qualified team will be allowed to explore treasure island. Here gatekeeper will be waiting for them. Gatekeeper is the person protecting the only gate towards treasure island. This gatekeeper will ask them one riddle if they answer it correctly he will help them with password of computer that is way towards the treasure otherwise they should find their way on their own i.e. hint for the password will be provided and they must unlock the PC with hint; If they fail to do so after fixed amount of time we will grant them access to the PC.

Part 2:

In specific amount of time they must fix all the bugs in the code provided which will be in some programming language. For every problem solved they will get the points.

Part 3:

Some coding challenges will be given teams have to solve them since these are obstacles in the way of treasure and they must face them.

Team earning highest points will get access to treasure box.

Rules

- Each team consists of two individuals
- The team cannot be changed after registration which will be free.
- Each team can register only once.
- Techno Hunt involves complex programming and problem-solving skills. Participants must be acquainted with at least one programming language preferably C, C++ or Java.
- Participants are not allowed to bring any media devices such as pen drives, CD, DVD etc.
- Cell phones must be switched off.
- All stationary such as pen, paper etc. will be provided.
- Any violation of rules will lead to disqualification of your team.
