TECHNOVANZA

Taking technology to society

C~WAY~

Ground Rules

➢ This event is totally structured upon C and will be using an array of concepts from basic to advance as you climb up the rounds ladder.

➢ It will have 3 rounds.

➢ Last 2 rounds will be strictly programming based.

➢ Each round will have its own set of points which will not be carried forward in rounds that succeed it.

➢ All the instructions provided should be followed as closely as possible and any attempt to circumvent them should be avoided.

Rounds

1. Basics of C

➢ In this the participants will have to pass an examination which will be of type Multiple Choice Question's or determining outputs and so on.

➢ The criteria will be decided on the basis of performance, a majority will be filtered out and remaining participant will advance to next level which is blind coding.

2. Blind Coding

➢ In this the participants will have to code given question or set of questions, but the monitors will be turned off and only can be turned once they are ready to submit the work.

➢ Participants will be evaluated accordingly and will advance to next level which is Ultimate C-coding.

3. Ultimate C-coding

➢ Here the finalists will be given scenarios and expected to solve the problems through coding.

Note:

All the events will be time and performance based and will be evaluated accordingly.
